1982 Manitoba Community Reports

Manitoba Community Reports, which have been published since 1967 by the Department of Economic Development and Tourism, provide basic information on 77 communities in the Province of Manitoba.

Our objective for this publication is to provide data for potential investors and entrepreneurs, as well as for others who may require information about Manitoba's developing communities.

A brief description of each community is followed by information on taxes, utilities, local resources, facilities, existing industries, and businesses and professional services, as well as the employers and local industrial development contacts.

Manitoba Community Reports 1982 will be distributed to business and industrial organizations. Copies of bound sets or individual town reports may be obtained upon request from the Department of Economic Development and Tourism.

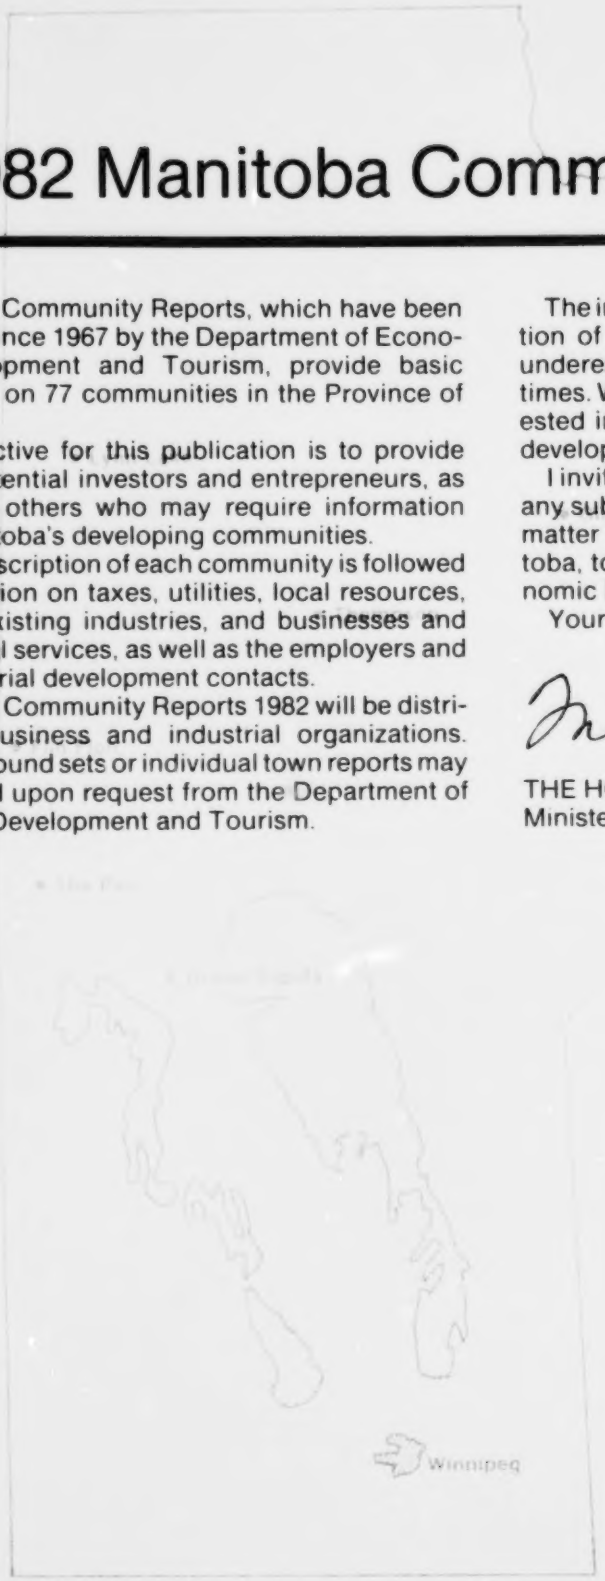
The importance of communities and the contribution of small business to job creation cannot be underestimated, particularly during these difficult times. We stand ready to work with all parties, interested in renewing the commitment to community development.

I invite anyone who wishes further information on any subject contained in this publication, or on any matter related to economic development in Manitoba, to contact the Manitoba Department of Economic Development and Tourism.

Your interest in Manitoba is welcomed.

Muriel Smith

THE HONOURABLE MURIEL SMITH
Minister of Economic Development and Tourism



Altona

October 1982 Community Report

The Town of Altona, incorporated on January 1, 1946, is located in the heart of the Pembina Triangle. An all-weather, non-restricted road (PTH #30) leads 113km south to Winnipeg and 10km north to the U.S. boundary.

Altona is surrounded by prime agricultural land which produces a variety of crops including all cereal grains, sunflowers, canola, corn, sugar beets, strawberries and other fruits. In addition there are several fairly large hog, poultry and dairy farm operations in the area.

The Town boasts a number of locally developed industries, including CSP Foods Ltd., D.W. Friesen & Sons Ltd., Radio Southern Manitoba and the Aetna Garment Co. Ltd.

Altona has an enclosed climate-controlled shopping Mall with some 25 retail shops and a bank. It also has one of the best eating establisments (Red Carpet Restaurant) in southern Manitoba.

Sports is a great part of the Community with an artificial ice Arena and a 5-sheet Artificial Ice Curling Rink. Altona captured both the League (S.E.M.H.L. hockey championship) and the M.A.H.A. Intermediate "B" Provincial Hockey Championship in 1980. The local High School Team (Miller Aces) have already captured their high school league title as have several of the minor hockey teams. A 9-hole, grass green golf course is located just 8km south of Altona and expansion to this course is in the planning stages.

The Annual Manitoba Sunflower Festival is held in Altona during the last week-end of July in each year.

Industries locating, expanding or modernizing in Altona, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Population

	Total	0-19	20-34	35-64	65+
1971 Census	2,125	795 (37.4%)	390 (18.4%)	590 (27.8%)	350 (16.5%)
1976 Census	2,480	835 (33.6%)	535 (21.5%)	630 (25.4%)	490 (19.7%)
1981 Census	2,757	860 (31.2%)	635 (23.0%)	705 (25.6%)	540 (19.6%)

Trading Area Population (incl. population of town): Local-5,500; Market-7,000

Speerherd Enterprises - sandblasting and printing (4)
Sun Valley Co-op Ltd. - department store, gas & oil (37)

Arborg

October 1982 Community Report

The Village of Arborg, incorporated January 1, 1964, is located 113km north of Winnipeg at the terminus of a branch line of the Canadian Pacific Railway in the heart of Manitoba's Interlake area. It is served by P.T.H. 7 which links the town with Winnipeg and by P.T.H. 68 which connects the town to Highway 6 to the west providing an access to Northern Manitoba.

An attraction spot in Arborg is a Cairn Commemorating Canada's Centennial.

The community functions as a farm-service centre and is situated in the middle of a rich cereal grains and livestock area. Arborg is a major farm machinery, bulk oil products and fertilizer centre in the Interlake region.

Included in the town's industrial sector is a cheese manufacturing plant, a feed mill, a creamery, a locker plant, a hatchery and a clothing factory. It is also the headquarters for the regional office of the Department of Agriculture and the head office of the Interlake Regional Development Corporation.

Industries locating, expanding or modernizing in Arborg, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Population

	Total	0-19	20-34	35-64	65+
1971 Census	880	320 (36.4%)	175 (19.9%)	275 (31.3%)	110 (12.5%)

Village of Arborg (4)

Beausejour

October 1982 Community Report

The Town of Beausejour, incorporated in 1904 as a village and as a town in 1912, is situated 61km northeast of Winnipeg, on highways 12 and 44. The town has adopted the slogan "Halfway from Work and Play" because of its location between the City of Winnipeg and the recreational area of the Whiteshell.

Of interest in Beausejour is the Broken-Beau Historical Society Museum. The Museum is a 6-building complex containing a church, bell tower and artifacts of early household utensils used by pioneers.

The major industry for the Beausejour district is agriculture. Two industries operate near the town, Western Peat Moss harvests and bags peat moss for home sales and export, and 13km west of the community world-famous Tyndall limestone is quarried.

Beausejour is the Eastern Region Headquarters for various provincial government departments. The town is also home to a number of Canadian Armed Forces personnel who man a radar station near the community.

Each year, during February, Beausejour hosts a "Winter Farewell" carnival. In conjunction with this event the Canadian Power Tobaggan races are held. Thousands of vistors are attracted to these activities every year.

Industries locating, expanding or modernizing in Beausejour, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Population

	Total	0-19	20-34	35-64	65+
1971 Census	2,235	800 (35.8%)	410 (15.3%)	685 (30.6%)	349 (15.6%)
1976 Census	2,422	720 (29.7%)	535 (22.0%)	705 (29.1%)	490 (20.2%)
1981 Census	2,462	655 (26.6%)	520 (21.1%)	720 (29.2%)	550 (22.3%)

Benito

October 1982 Community Report

The Village of Benito, incorporated in 1941, is located in a valley 483km northwest of Winnipeg on Highway #83. The valley has the Porcupine Mountains to the North and the Duck Mountains to the south. The village is located close to the Saskatchewan border thus increasing its trading population by one-third.

Benito is surrounded by a very productive agricultural area. Local economy is based mainly on the production of wheat, oats, malting barley, flax, and canola seeds. Added to this base is a considerable livestock production.

The nearby Porcupine and Duck Mountains provide such recreational facilities as camping, swimming, golfing, fishing, and summer or winter skiing. Big game hunting is also very popular in this area. Also, a popular event is the Benito Rodeo (June) with an especially excellent show of horses.

Industries locating, expanding or modernizing in Benito, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Population

Birtle

October 1982 Community Report

The Town of Birtle, incorporated in 1884, lies in the scenic Birdtail Valley approximately 322km west of Winnipeg on P.T.H. 16 and 42, and 64km on P.T.H. #1 via P.T.H. 83. The town is located on one of the principal north-south road arteries in the Province. It provides a major link between Northern Manitoba and the United States. Rail service is supplied by the Winnipeg-Edmonton line of the Canadian Pacific Railway.

Birtle is an agricultural trading service centre. Wheat, oats, bariey, rye, flax and rapeseed are produced in the area, along with an increasing number of cattle and hogs.

The community has an active sports program and has developed a number of good recreational facilities which offer a potential for tourism as well as serving the needs of the area.

Industries locating, expanding or modernizing in Birtle, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Boissevain

October 1982 Community Report

The Town of Boissevain, incorporated on March 16, 1906, is located on highway 10, 76km south of Brandon and 26km north of the U.S. border, and 272km south west via P.T.H. 2 and 10 from Winnipeg.

The economy of the community is primarily based on agriculture. Special crops such as rapeseed, mustard, sunflower seeds and vegetables are grown in the area, as well as the basic crops of wheat, oats, barley, rye and flax. There is also fairly extensive production of cattle, hogs and poultry.

The major industries in Boissevain are Dring Canada Ltd., manufacturing laminated structures and stressed skin panels, and Irvin Goodon Industries Ltd., producing building materials. Some oil production and exploration is carried out in the surrounding area.

Tourism is important to Boissevain because of its proximity to the Turtle Mountain Provincial park and to the International Peace Gardens. Thousands of tourists pass through the town each year on highway 10, the main direct access route to Northern Manitoba. Boissevain is home of the annual Canadian Turtle Derby which is held in the month of August. This event attracts visitors from all over North America.

Outdoor recreation is a major activity in this area. Water sports, boating and fishing are popular on the nearby lakes. An outdoor heated swimming pool together with complete camping facilities are also available.

Industries locating, expanding or modernizing in Boissevain, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Bowsman

October 1982 Community Report

The Village of Bowsman, incorporated in 1949, is located east of the Porcupine Provincial Forest, 193km north of Dauphin and 547km northwest of Winnipeg.

At the beginning of the century, Bowsman was based on the logging and lumbering industry, but today the economy of the area is based strictly on agriculture. The major crops produced are wheat, barley, oats, rapeseed and flax. Being only 13 km. north of Swan River on PTH No. 10, a number of families prefer the small town setting, settling in Bowsman and commuting to their farms in the area or to their work in Swan River.

Good fishing, hunting and camping facilities are to be found south of the village in the Duck Mountains, and to the north in the Porcupine Hills.

Industries locating, expanding or modernizing in Bowsman, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Population

	Total	0-19	20-34	35-64	65+

Brandon

October 1982 Community Report

The City of Brandon, incorporated in May, 1882, is the regional centre for the large, fertile farm area of southwest Manitoba and southeast Saskatchewan. The City is located 209.2km west of Winnipeg at the junction of Trans-Canada Highway 1 and P.T.H. 10. The City is the centre of agriculture, commercial and industrial activity in Western Manitoba and Eastern Saskatchewan. In relatively close proximity to Brandon are Riding Mountain National Park some 88.5km directly North, Turtle Mountain Provincial Park about 88.5km to the south, and Spruce Wood Provincial Forest Reserve and Park 19.3 — 24km to the east. The International Peace Gardens are 96.5km south and the Saskatchewan border 122.3km west.

Although the economy of Brandon is primarily based upon agriculture and many agricultural oriented industries have been established, there are a number of industries not directly related to it which help to diversify Brandon's industrial base. Included in these are printing and publishing, metal products fabrication, electrical equipment manufacture, the needle trades and woollen mills — and many others.

Recreation facilities in Brandon are numerous and provide something for everyone — swimming, curling, golf, tennis, indoor and outdoor bowling, badminton, skating, skiing, hockey, archery, baseball, billiards, rifle teams and skeet shooting. The area is noted for upland game, ducks and good fishing.

Two major exhibitions are held each year in Brandon — The Royal Manitoba Winter Fair holds the spotlight in the spring where the stock show includes entries from all across Canada. It is considered to be the largest and best of its kind in the country. The provincial Exhibition in June attracts many thousands of people to Brandon and activities include stock judging, light and heavy horse shows, rodeo, harness racing, and midway and grandstand shows.

Industries locating, expanding or modernizing in Brandon, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Population

	Total	0-19	20-34	35-64	65+

W.B. Webber & Sons - printing & lithographing

Carberry

October 1982 Community Report

The Town of Carberry, incorporated as a town in 1905, is located 161km west of Winnipeg and 48km east of Brandon and is 3km south of the Trans-Canada Highway. The town is served by the Canadian Pacific Railway.

An interesting feature of Carberry is its location on an island of highly fertile soils surrounded by fixed sand dunes and heavy tree cover. The dunes are remains of the Assiniboine River delta of the glacial period.

In 1961, the agriculturally-based economy was supplemented with the establishment of the Carnation Foods Co. Ltd. potato processing plant. The excellent soils and ample water supply were two of the main reasons for the plant locating at Carberry.

A Mobile Home Subdivision in the west end of town, where people may purchase their own lots for their trailers, has recently been completed.

Easy access is provided by Provincial Road 258 to the recreational opportunities of the Spruce Woods Provincial Park which lies to the south of Carberry.

Industries locating, expanding or modernizing in Carberry, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Population

	Total	0-19	20-34	35-64	65+
1971 Census	1,305	425 (32.6%)	230 (17.6%)	400 (30.7%)	265 (20.3%)

Carman

October 1982 Community Report

Carman, incorporated in 1905, in a scenic, well-treed town located on the Boyne River 80km southwest of Winnipeg at the junction of highways #3 and #13. The town is served by both Railways, daily transfer and bus connections with Winnipeg, and is 80km from the Winnipeg Airport.

Carman boasts of being an excellent agricultural service centre, with one of Western Canada's inland terminal elevators being a real service to the area. It is also the financial centre of southern Manitoba, as well as the recreational centre for the southern part of Manitoba. The town also has excellent educational and medical facilities, and senior citizen housing.

The Carman district is the northern segment of the prosperous intensively farmed area known as the Pembina Triangle. In that triangle, agricultural production includes cereal grains, sunflowers, rapeseed, beans, peas, flax, buckwheat, corn, potatoes, sugar beets, cattle, hogs, and poultry.

New industries in Carman are Man-Corn Sale Coop Ltd. and Linear Agra (Man.) Ltd. both dealing with corn producers. Man-Corn sales is a $1.3M plant to handle receiving, blending, screening and shipping for local and export. Linear Agra facilities receive, screen and ship corn.

An industrial park is being planned, and according to a 1978 labour survey, an adequate labour force is available.

The Stephenfield Dam, which was built in 1963 in the rolling terrain, approximately 16km west of Carman, assures the town of a water supply from the Boyne River as it has a capacity of 3,400 acre-feet, and is the site of a provincial park. Slightly west of the park in the Pembina Hills are two ski resorts which provide popular winter recreation.

Industries locating, expanding or modernizing in Carman, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Churchill

October 1982 Community Report

Churchill, a Local Government District, is situated at the mouth of the Churchill River on the western shore of Hudson Bay, 1,609km by rail north of Winnipeg. It is at the terminus of the Hudson Bay Railway, a secondary main line of the C.N.R. which extends through 800km of wilderness between The Pas and Churchill.

In recent years the townsite was completely redeveloped and consolidated the communities of Churchill and Fort Churchill. A Northern Studies Centre was officially opened in 1977 at Akudlik, 3 km south of Churchill.

The Port of Churchill is Canada's most northerly deep seaport through which millions of bushels of grain are shipped each year. The Port with its 180,000 cubic metres storage capacity offers a shipping route which is about 1,600km shorter to Europe than through Montreal. It also can provide benefits to importers and exporters serving Europe.

Set in the northern wilderness of Manitoba, Churchill is an ideal centre for many recreational pursuits. The local Chamber of Commerce promotes tourism in the Churchill district.

Industries locating, expanding, or modernizing in Churchill, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Population

	Total	0-19	20-34	35-64	65+
1971 Census	1,604	785 (48.9%)	370 (23.1%)	385 (24.0%)	50 (3.1%)
1976 Census	1,699	775 (45.6%)	550 (32.3%)	355 (20.8%)	30 (1.7%)
1981 Census	1,304	515 (39.5%)	440 (33.7%)	305 (23.4%)	40 (3.1%)

Crystal City

October 1982 Community Report

Crystal City, incorporated on January 1, 1947 as a village, is located 193km southwest of Winnipeg on P.T.H. #3 and #34.

The community is located in one of the more productive farming areas in the Province. A transition has been made from extensive to intensive farming and the production of cattle and hogs has increased considerably. Dairying has also made substantial progress in the latter years, and the production of special crops is increasing.

The village is close to Rock Lake, which is known as one of southern Manitoba's prime hunting and fishing areas.

Crystal City is served by the Canadian Pacific Railway and by daily bus and transfer connections with Winnipeg.

Industries locating, expanding or modernizing in Crystal City, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Dauphin

October 1982 Community Report

Dauphin, incorporated as a village in 1898 and as a town in 1901, is located 338km northwest of Winnipeg and is situated on P.T.H.'s #5, #10 and #20. It is a C.N.R. terminal. Most north-south rail and road traffic between northern and southern Manitoba pass through Dauphin. The Manitoba Department of Highways operates a large Public Works Garage complex here, and the Sign Shop for the whole province. This strategic location has enabled the town to establish itself as the distribution centre for the region and to strengthen its position as a service centre.

Of historical interest is the Fort Dauphin Museum, located across the Buckwold Bridge. Housed in the Museum is a wide selection of artifacts from the days of the fur trade, explorers, and pioneers, as well as archeological items.

Over looking the Dauphin Valley countryside of first settlers, is a 16 foot statue of "Amisk". Amisk is the Cree name for beaver and was a 1967 Centennial project. The beaver has been nicknamed "The Beaver of Skilligalee" in commemoration of the name given to the district of Scottish and Irish settlers.

Located 25km southwest of Dauphin, is a cairn held in commemoration of the central European settlers, the first group of families who came to this area with the opening of the railway in 1896.

Located 7km west of Dauphin on highway 5 is McCallum Museum and Trading Post - a collection of early century farm machinery implements, household artifacts, stage coaches, etc.

Agriculture is still the most important aspect of the economy. It includes grains, special crops, forge crops, and livestock.

The last few years have seen a substantial increase in industrial development in Dauphin. Industries located in the town include a concrete plant, a feed mill, an alfalfa plant, an abattoir, and a milk processing plant which also manufactures cheese.

Industries locating, expanding or modernizing in Dauphin, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Deloraine

October 1982 Community Report

The Town of Deloraine, incorporated in 1904, is located 298km southwest of Winnipeg and 113km southwest of Brandon. Situated near the junction of P.T.H. 3 and 21, the town is also only 48km northwest of the International Peace Gardens.

As an agricultural trading centre, Deloraine and the surrounding area are mainly devoted to mixed farming and livestock production. In addition to basic crops such as wheat, oats, barley and flax, special crops such as grass seeds, sunflowers, corn and radish seeds are also grown.

Deloraine, a sportsminded community, has good recreational facilities for hockey, curling, waterfowl and big game hunting. There is also a beach and camping area at Lake Metigoshe, 32km southeast of the town in the Turtle Mountain Provincial Park.

Industries locating, expanding or modernizing in Deloraine, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Population

Elkhorn

October 1982 Community Report

The Village of Elkhorn, incorporated on September 5, 1906, is situated approximately 105km west of the City of Brandon and 289.6km from Winnipeg, on the Trans-Canada Highway and also on the main line of the Canadian Pacific Railway. Elkhorn also has daily bus and truck transfer services.

The community surrounding Elkhorn is well adapted to mixed farming, with a large volume of cattle and hogs being produced in the area.

The Manitoba Antique Automobile Museum located in Elkhorn has grown to be a major tourist attraction in the province.

The community has a curling rink, a skating rink and a nine-hole golf course.

Industries locating, expanding or modernizing in Elkhorn, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Emerson

October 1982 Community Report

The town of Emerson, incorporated on November 25, 1879, is situated on the Red River, 105km south of metropolitan Winnipeg on P.T.H. 75. The town, which is served by branches of the Canadian Pacific Railway and the Canadian National Railway, is Manitoba's main custom port on the Canada-U.S.A. border. Approximately two million tourists pass through the community each year.

Emerson's history goes back to the 1850's when the Hudson's Bay Company built a trading post just inside the Canadian boundary. It is also the site of Fort Dufferin, the first barracks of the first detachment of the Northwest Mounted Police. The Town Hall of 1917 still unites the past to the present.

In addition to serving as a custom port, the town is located in the heart of the Red River Valley, an area of intensive agriculture in which cereal grains, sugar beets and sunflowers are grown. Crop yields in this area are generally higher than those in the province as a whole.

Industries locating, expanding or modernizing in Emerson, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Population

	Total	0-19	20-34	35-64	65+

Erickson

October 1982 Community Report

The Village of Erickson, incorporated on July 26, 1952, is located on P.T.H. 10, 19km south of Riding Mountain National Park. The Gateway to the "National Park" is 245km northwest of Winnipeg on P.T.H. 16, and 87km north of Brandon on P.T.H. 10. Its elevation is 2,054' which makes it the highest community in Manitoba.

The village is nestled in rolling hills dotted with lakes. The natural vegetation of mixed strands of broadleaf and coniferous species are chiefly spruce and aspen, grey and grey-green shale and silicious shale.

The area north and west of the village is especially suited for mixed farming and dairying, while the east and south are ideal for grain production. Lumbering is also carried on to some extent in this area.

The Department of Environment Fresh Water Institute and Erickson Field Station carry on studies on the future of rainbow trout fishing in the nearby lakes and ponds.

The "Land of the Vikings" as the district is known, is a good area for recreation. Snowmobiling on the many lakes and trails is very popular with local people as well as visitors. Fishing in summer and winter takes care of many leisure hours. Good duck, deer and elk hunting is also available.

Industries locating expanding or modernizing in Erickson, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Ethelbert

October 1982 Community Report

The Village of Ethelbert, incorporated in 1950, is located 60km northwest of Dauphin and is situated on P.T.H. 10A and 402km from Winnipeg on highway 10. The village is close to the Duck Mountains, an attractive tourist and recreational area.

The service trade from the Ethelbert district is based on agriculture, primarily mixed farming. Ethelbert functions as a service centre for the surrounding area.

Industries locating, expanding or modernizing in Ethelbert, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Population

Flin Flon

October 1982 Community Report

The mining centre of Flin Flon, incorporated in 1970, is located at the northern end of P.T.H. 10, 885km northwest of Winnipeg. Close proximity to the Saskatchewan border enables easy access for shopping and employment for Saskatchewanites in Flin Flon.

The economy of the City is based primarily on the operation of Hudson Bay Mining and Smelting Co. Ltd. In terms of production, it operates the third largest copper smelter and largest zinc refinery in Canada. Its concentrator can treat up to 6,000 tons of ore daily. Also produced are gold, silver, cadium, selenium, and telurium.

Points of local interest is the Flin Flon Museum located off bypass No. 10A Highway. Housed here is a collection of antiques, local pioneer material along with Hudson Bay Mining and Smelting Company antiques, tools, and ore samples.

The Flin Flon Parks Board Animal Shelter, located on Green Street, has various species of deer and a wide variety of birds.

Flintabbatey Flonatin, standing 24' tall, gave the town its name. This humourous statue of "Josiah Flintabbatey Flonatin", a character in a dime novel, came to life through the American cartoonist of L'il Abner fame, Al Capp. A plaque, located in Town Park, is dedicated to Mandy Mine, Manitoba's first productive copper mine in 1916, prompting a boom and development in northern mining potential.

A Wildlife Sanctuary of 25 acres is home for various species of wildlife.

The all-weather paved road connecting Flin Flon to the U.S.A. and the availability of high standard hunting and fishing lodges are prime tourist attractions. The surrounding area has many lakes well stocked in game fish. The Hanson Lake Road, connecting Flin Flon to Prince Albert, makes possible an interchange of tourists and sports enthusiasts in this part of the north.

A notable feature of the tourist season is the Flin Flon Trout Festival, a gala three to four day event which has been held annually the week of July 1st. This event features the "Trout Derby" and the "Canadian Gold Rush Canoe Derby", with first prizes of $1,000 for each. Other contests distinctive to the festival include floor packing, bannock baking and pulp cutting. Visitors and contestants come from many parts of Canada and the U.S.A.

Industries locating, expanding or modernizing in Flin Flon, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Gilbert Plains

October 1982 Community Report

The Village of Gilbert Plains, incorporated in July, 1906, is situated in the fertile plain between the Riding and Duck Mountains. It is at the junction of P.T.H. 5 and Provincial Road 274 and is 328km from Winnipeg on P.T.H. 5. P.T.H. 5 connects Gilbert Plains with Dauphin 32km to the east and Yorkton, Saskatchewan 129km to the west. Provincial Road 274 links up with the playgrounds in the Duck Mountains, about 65km to the northwest.

The cultivated fields of this region are separated by sparsely wooded areas and the small meadows. The grass-woodland type soil is used for cereal grain, livestock and poultry farming and dairying. The service trade of this village is based on the agricultural activity of the surrounding area and the lumbering trade of the Duck Mountains.

Just three blocks from the downtown area of Gilbert Plains, there is a nine-hole golf course with grass greens in a natural setting in the valley of the Valley River. Adjacent to the golf course is a municipally operated campground complete with showers, electrical hook-ups, a playground, a children's wading pool and kitchenette.

Industries locating, expanding or modernizing in Gilbert Plains, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Gillam

October 1982 Community Report

Gillam, on the Nelson River, 729 air kilometres north of Winnipeg, is a CN railroad terminal point about halfway between Churchill and Thompson. It received its name from Zachary and Benjamin Gillam, captains of rival fur-trading ships in the time of Radisson.

Of historical interest is the Gillam Community Museum that houses artifacts relating to the early history of the area.

When Manitoba Hydro began construction in 1966 on the Kettle Generating Station about 8km from Gillam, the Local Government District of Gillam was incorporated. Electricity, sewer and water, a new school and other amenities arrived in short order as the community quickly grew. A modern townsite has been built immediately adjacent to the original community, including a fully serviced trailer park with capacity for 600 units.

The Kettle Generating Station, completed in 1974, is Manitoba's largest electric power plant. It has 12 turbine generators with a total capacity of 1.3 million kilowatts. Also located near Gillam is the Radisson Converter Station, northern terminus of one of the world's longest (900km) and highest voltage (900,000) direct current transmission systems.

Gillam is headquarters for further hydro-electric development of the Lower Nelson River. Downstream from Kettle are four more million-kilowatt potential sites. The first, Long Spruce, was completed in the late 1979. The second, Limestone, is scheduled to produce power in 1987. Upstream of Kettle are two more hydro sites with a total potential of 1.1 million kilowatts.

Industries locating, expanding or modernizing in Gillam, depending on size, may be eligible for either A Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Population

Gimli

October 1982 Community Report

Gimli, incorporated as a village in 1908, and a town in 1948, is located 97km north of Metropolitan Winnipeg on the west shore of Lake Winnipeg. Settlement dates from 1875 when a group of 286 Icelanders established a settlement at the present townsite. Today about half of Gimli's population is of Icelandic origin and each year, during the August long-weekend, an Icelandic Festival is held attracting thousands of visitors to the town.

The community serves as a trading centre for an area of mixed farming with some specialized dairy production. Gimli has traditionally been a popular summer resort area which currently offers a tourist trailer park and camping facility. The beautiful beach area of Gimli is complemented by the excellent sheltered harbour facilities available to boating and sailing enthusiasts.

The former Canadian Forces Base at Gimli was converted into an industrial park in 1971. A number of industries and commercial firms have located in the industrial park, including Triple E Industries and Ontario Central Airlines Co. Ltd., and the Canadian National Railway operates a country-wide training school for locomotive engineers at the former base. This operation was expanded in 1978.

Gimli is also the location of a $20 million distillery run by Calvert of Canada Ltd.

Industries locating, expanding or modernizing in Gimli, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Gladstone

October 1982 Community Report

The Town of Gladstone, incorporated in 1882, is in the centre of one of the earliest settled districts in Manitoba. The first settlers arrived here from Ontario about 1871 and staked their claims at the Third Crossing of the Whitemud River. To commemorate that historical occasion, a cairn was erected in 1957, the same year in which the town celebrated its 75th anniversary.

Gladstone is located on the Yellowhead Interprovincial Highway, at the junction of P.T.H. 16 and 34, 148km northeast of Winnipeg. The community is served by both C.N.R. and C.P.R. rail and truck service, a locally owned trucking franchise and also Greyhound and Grey Goose Bus Lines. A municipal airport is located 6km south of the town on Highway 34.

Located in the Town of Gladstone near "Third Crossing Nursing Home", at junction of highway 16 and road through town, is a cairn marking the third crossing of the Whitemud River on the Pioneer Trail Fort Garry to Edmonton. Here, in 1871, the first settlement was known as Palestine then in 1882 the town was incorporated as Gladstone.

The Gladstone Museum houses pioneer material relating to the district.

Located in the heart of one of the best mixed farming areas of the Province, Gladstone also boasts a flourishing cattle Auction Mart which was established in 1963. Major industries include concrete building products, recreational vehicle and pottery manufacturing plants, all serving a wide area extending beyond provincial borders.

Industries locating, expanding or modernizing in Gladstone, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Glenboro

October 1982 Community Report

Glenboro, incorporated on January 2, 1950, the gateway to Spruce Woods Provincial Park and "Manitoba Desert", is situated at the junction of highways 2 and 5, only 11km south of the Spruce Woods Provincial Park and Kitchie Manitou Beach. Glenboro, an agricultural community, is situated 169km west of Winnipeg on highway 2 and 72km southeast of Brandon on highway 2.

The agricultural area is predominantly devoted to mixed farming, and the soils in the area are very suitable for such specialized crops as potatoes, corn and sunflower. An abundant supply of ground water is available and some used for irrigation of crops.

Glenboro Village has many historical sites, two of which are related to the early history of the area. Grun and Bru churches, only a few kilometers south of the community, still stands as a monument to the early settlers. Grund Church, built in 1895 is the oldest Icelandic Lutheran Church in Canada and has been designated as an historical site. The prow of the S.S. Alpha, a steamboat that travelled the Assiniboine River in the early days, is on display in Glenboro.

Architecturally speaking, two family residences, constructed by founders of Glenboro, Mr. James Duncan and Mr. Jonas Christie are still in use.

The "Manitoba Desert" is located 11km north of Glenboro on highway 5. "Sara", an 18 foot life-like camel stands on a 5 foot concrete pedestal in the Glenboro Chamber of Commerce Park along highway 2. "Sara" is busy promoting the community and the "Manitoba Desert." Also of particular interest, is the Stockton Ferry, located some 33km northwest of Glenboro, which is still in operation and is used to cross the Assiniboine River.

The Glenboro area offers a number of opportunities for camping and hunting and fishing enthusiasts. The Spruce Woods Provincial Park, just 11km north of Glenboro provides for excellent camping facilities, trailer park, swimming, hiking and picnic areas. The Old Assiniboine River, which was once the water route used by the big paddlewheel steamers, which plied their way up the serpentine curves for 600 miles to trading posts in the Northwest, separates the "Manitoba" Desert from the Kichie Manitou Beach. The park provides for winter recreation with both excellent snowmobile trails and cross country skiing trails, together with an open air skating pond and toboggan slides.

Industries locating, expanding or modernizing in Glenboro, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Grand Rapids

October 1982 Community Report

The community of Grand Rapids, incorporated on March 1, 1962, is comprised of the Local Government District of Grand Rapids on the West side of the Saskatchewan River and the Grand Rapids Indian Reserve of the east side. The Community is 426km from Winnipeg via #6 highway. The Manitoba Hydro generating station is located 3km north of the settlement but still within the L.G.D.

Historically, the settlement of Grand Rapids was originally known as Fort Bourbon. It was the first of many fort-type trading posts built along the river. Fort Bourbon was built with the discovery of the Saskatchewan River in 1741 by Le Chevalier de la Verendrye.

In 1877 the Hudson's Bay Company built a tramway to move cargoes from the mouth of the Saskatchewan River to a navigable port. This tramway was operated by horse-drawn carts and was actually the first railway to be built in the Canadian West.

The economy of the area is based on tourism, commercial fishing, a forest products operation and trapping. The area is especially good hunting ground for moose, deer, waterfowl and game birds. Cross Lake, adjacent to Grand Rapids, accessible via P.T.H. 6 is nationally known as one of the finest master angler award fishing lakes.

Industries locating, expanding or modernizing in Grand Rapids, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Population

Grandview

October 1982 Community Report

The Town of Grandview was incorporated in March, 1909 and is situated on a narrow plain between the Riding and Duck Mountains, and at the junction of P.T.H. 5 and Provincial Road 366. The town is located 373km from Winnipeg on P.T.H. 5, west of Dauphin. Grandview was originally settled in 1980 and was the fourth community in Manitoba to install a piped water system.

Grandview has always been noted for having teams participating in the sports of baseball, hockey and curling over the years. The Wilson Centennial Park with its baseball diamonds, skating and curling arenas, and fully serviced campground exhibits this continued community's interest in sports. Adjacent to the Park is an outdoor swimming pool and the famed Watson Crossley Community Museum.

The service trade of the town is based primarily on agriculture and the winter logging operations. Support from the tourist trade is increasing due to the accessibility to the lakes and amenities in the nearby Duck Mountains. Cereal production, livestock and dairying are major agricultural activities.

Over the years, efforts have been made to provide an infrastructure in Grandview which would, in turn, offer the modern amenities to present and future residents. The favourable results of this concerted effort have lead to the continued growth of the community.

The annual "Old Time Picnic" is held in early August each year and various events including baseball tournaments and a horse gymkhana are a part of the popular "Picnic."

Industries locating, expanding or modernizing in Grandview, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Gretna

October 1982 Community Report

The Village of Gretna, incorporated on May 16, 1896, is located on the Canada-U.S.A. border 121km southwest of Winnipeg and has a border crossing on P.T.H. 30.

Gretna is quite steeped in history, going back to 1820. The village is the site of the first Mennonite settlement in western Canada. With agriculture, the first grain elevator in western Canada appeared here.

Continuing on in history, Gretna is the home of the 1820 boundary markers (located 6.5km west of Gretna) on the Canada-U.S.A. border, as one travels to the Village of Blumenort. These markers were placed there after the 1818 Convention of London, Ontario. The village is also the home of the Peace Bell. The Bell, situated in Centennial Park, is a permanent commemoration of Canada's 1967 centennial. The twenty-five foot Bell spells the message of peace between nations at the annual Rememberance Day service on November 11.

Located on P.T.H. 30 and 1km from Gretna is a commemorative cairn honouring the arrival of the Mennonites in 1875. The Mennonites crossed the Red River at Emerson and went westward on Post Road into the treeless plains shunned by earlier immigrants.

The surrounding area of intense, diversified agricultural products also produces sugar beets, sunflowers, and all cereal grains, plus many specialty crops, such as canary seed, peas, beans, and lentils.

Industries locating, expanding or modernizing in Gretna, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan under the Rural Small Enterprise Incentives Program.

Hamiota

October 1982 Community Report

The Village of Hamiota, incorporated in 1907, is located 80km northwest of Brandon at the junction of P.T.H. 21 and P.R. 469. Daily bus service is provided by Grey Goose. Truck service is provided by Hamiota Kenton Transfer. The rich "northern-black" soil provides consistant crops, mainly grain seeds. Beef cattle and hogs are an important source of income on some farms.

Of interest in Hamiota is the Pioneer Club Museum. This collection is comprised of wildlife displays, farm machinery, home furnishings and pioneer material gathered in the area.

Hamiota will celebrate its Centennial in 1984.

Health services are provided by Hamiota District Health Centre. The Board is composed of representatives of the Rural Municipalities of Blanshard, Hamiota, Miniota and Woodworth. The Village of Hamiota, provides health care for an area of 1,000 square miles and 5,000 citizens. Hospital, Medical Clinic, (3 doctors), Personal Care Home, Lab. and Xray unit, Public Health Care, Mental Health Care and Special Clinics for Hypertensives and diabetics are all under Board jurisdiction.

Industries locating, expanding or modernizing in Hamiota, depending on size, may be eligible for either a Federal Government grant under the Regional development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Hartney

October 1982 Community Report

The Town of Hartney, incorporated in 1905, is located on Provincial Highway 21, about 74km southwest of Brandon on P.T.H. #1, and 285km from Winnipeg. Hartney is a service centre for an agricultural district. The Town was named after James H. Hartney, an early postmaster, who settled in the Souris River Valley between 1880 and 1883. The railway came to Hartney in 1890.

A point of interest near Hartney is Lauder Sandhills Wildlife Management Area. This area is located about 64km sw of Brandon and 6.5km west of Hartney and north of the Souris River, adjacent to Provincial Roads 347 and 254. Steeped in history, this Wildlife Management Area is similar to several semi-arid southwestern sites. The old sand dunes stabilized by prairie grasses, bur oak and aspen, the well-drained sands harbour cacti with brilliant flowers. This area is open to upland game bird and big game hunting and furbearer trapping, subject to regulations. For naturalists, hikers, cross-country skiers and the non-mechanized recreational users, this Area accommodates all.

For the year-round sportsminded, there is the Souris River, a park, a golf course, heated swimming pool, and tourist attractions for the summer months. The Hartney Memorial Rink is a busy recreation facility during the winter months.

Industries locating, expanding or modernizing in Hartney, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Killarney

October 1982 Community Report

The Town of Killarney, incorporated on June 4, 1907, is situated at the junction of P.T.H. 3 and 18, and was built on the shores of the lake which bears the same name. The town is located 241km southwest of Winnipeg and 19km from the United States border. Highway 3, which intersects the town, follows the La Verendrye Trail and the Boundary Commission Trail of the early 1870's.

Killarney has an interesting history. A plaque located south of the junction of highways 3 and 18, 10km south of Killarney marks the trail used by the Boundary Commission when re-platting the 49th parallel (1872-73). The ruts are still visible on a nearby, unbroken farmland.

Located at 414 Williams Avenue in Killarney, is the J.A.V. David Museum. Pioneer settlement belongings, Indian artifacts and other relics of war are on display. Mounted birds and animals, books, bibles, photographs, together with modern and traditional oil paintings are on display.

Killarney Lake and the surrounding area offers a wide range of recreational facilities making it a popular resort for tourists. Some of the attractions are a long, sandy beach, picnic and camping area, public dock, water skiing and swimming, aquatic sports, a nine-hole golf course with grass greens and watered fairways, a museum, upland game, duck, geese and deer hunting and fishing in season. Pelican Lake and Rock Lake, located nearby, provide additional opportunities for tourist entertainment. Pelican Lake is especially suited to sailing.

Industries locating, expanding, or modernizing in Killarney, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Lac du Bonnet

October 1982 Community Report

The Village of Lac du Bonnet, incorporated on December 31, 1947, is situated on the western bank of the Winnipeg River, 113km northeast of Winnipeg and a few kilometers north of the Whiteshell Nuclear Research establishment at Pinawa.

A historical site at Lac du Bonnet is the Old Pinawa dam. Here are the ruins of the first power dam built in Manitoba.

This is predominantly an agricultural area producing cereal grains, cattle, hogs and poultry. The district is also noted for its production of wild rice and pulpwood. The recreational facilities offered are very good and fly-out service to remote lakes is available.

Lac du Bonnet serves as a commercial centre to area residents and the town's picturesque setting on the Winnipeg River has attracted a considerable number of summer cottages to the area. There is a good seaplane base at Lac du Bonnet and the headquarters for the Manitoba Government Air Services for the province is located here. Also of importance to the town's economy, are the five hydro-electric power stations located both upstream and downstream from Lac du Bonnet. Tantalum Mining Corporation Ltd. at Bernic Lake, some 56km northeast of the village, produces tantalum and cesium.

Industries locating, expanding or modernizing in Lac du Bonnet, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Leaf Rapids

October 1982 Community Report

The Town of Leaf Rapids, incorporated on September 26, 1976, is located 212km northwest of Thompson and 105km southeast of Lynn Lake on Highway 39 and 964km from Winnipeg on PR 391 northwest of Thompson.

Established between 1971 and 1974, Leaf Rapids primarily accommodates employees and staff of Sherritt Gordon Mines' Ruttan operation, located 25km east of the community. The mining of copper and zinc at the Ruttan Mine provides the economic base of the town.

The Town Centre complex, officially opened in September 1974, accommodates not only retail and recreational facilities, but also a hotel, a health centre, a school library, Exhibition Centre and government offices. In addition, a number of retail and service outlets are located in the Industrial Park of Leaf Rapids. An airline, taxi company, bus company and several trucking companies provide service to the community.

Year round, a large variety of social and recreational activities, indoor and outdoor, are available to Leaf Rapids residents, ranging from fishing in the nearby Churchill River and surrounding lakes, to ice hockey and photography.

Industries locating, expanding or modernizing in Leaf Rapids, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise incentives Program

Lynn Lake

October 1982 Community Report

Lynn Lake, incorporated in 1951, is located 800 air km northwest of Winnipeg, 241 air km north of Flin Flon at the terminus of a CNR branch line, and 100 km on PR #391 northwest of Leaf Rapids. It is regularly serviced by Pacific Western and by chartered airways. The Lynn Lake Municipal Airport has a 5000' paved runway and facilities include aeradio meteorological station with navigation aids consisting of V.O.R. and N.D.B. Refuelling facilities are available 24 hours a day. Provincial Highway 391 was officially opened in 1974, linking Lynn Lake with Thompson and the Manitoba road system.

The economy is based mainly on the copper-cobalt-zinc mining operations of Sherritt Gordon Mines Ltd. which suspended operations at Sherridon and moved to the present site more than 25 years ago. A new mine at Fox Lake, located 48 km south of Lynn Lake, was officially opened in 1970. Copper and zinc concentrates are shipped to the refineries in other parts of Canada.

The fishing industry is also significant. Lynn Lake is a gathering and redistribution point for fresh and frozen fish which is brought in from the area and reshipped by truck to commercial markets through the Freshwater Fish Marketing Corporation.

The numerous lakes in the area offer excellent sport fishing. This is attracting an increasing number of tourists who fly into surrounding lodges and camps by chartered or private aircraft. Three local firms provide charter air services.

Industries locating, expanding or modernizing in Lynn Lake, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

MacGregor

October 1982 Community Report

The Village of MacGregor, incorporated in 1948, is situated 121km west of Winnipeg and 37km west of Portage la Prairie on the Trans-Canada Highway 1.

The surrounding agricultural area yields the traditional grain crops of wheat, oats and rye as well as other crops such as rapeseed, sunflowers and corn. Increasing quantities of potatoes are grown in the district to fill contracts with Carnation Foods Company in Carberry and McCain Foods in Portage la Prairie.

Close to the village are the Delta Marshes, noted for being the home of the Delta Waterfowl Research Station of Ducks Unlimited. The Manitoba Agricultural Museums is located just south of Austin on P.T.H. 34, which is 11km west of MacGregor on the Trans-Canada Highway 1.

Recreational facilities in MacGregor include a recreational complex which was built with the support of the area's residents in terms of volunteer labour and financial donations. This complex contains curling and skating rinks with artificial ice.

Industries locating, expanding or modernizing in MacGregor, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Manitou

October 1982 Community Report

The Village of Manitou, incorporated on April 21, 1897, is located 161km on P.T.H. 3. Manitou was cited for the "Best Village Award" by the Manitoba Good Roads Association in 1979.

Manitou is the home of well-known temperance leader, suffragette, and Canadian author, Nellie McClung. A provincial plaque in her honour is housed in the Manitou High School.

The Village is located in a zone that may be described as a transition between the intensive agriculture to the east and the extensive agriculture to the west. Agricultural production includes cereal grains, corn, peas, beans, sunflower, and rapeseed. Also, cattle, hogs and poultry are raised.

The Village places sports high on the list substantial with such recreational outlets as a swimming pool, a golf course, hockey, and curling rinks, and an indoor rifle range.

Industries locating, expanding or modernizing in Manitou, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

McCreary

October 1982 Community Report

The Village of McCreary, incorporated in 1964, is located at the junction of P.T.H. 5 and P.T.H. 50 on the east side of Riding Mountain National Park, approximately 257km northwest of Winnipeg. It has daily freight and tri-weekly passenger service supplied by the C.N.R. and VIA Rail, two bus lines and a trucking firm.

The farming area to the west of the village produces the traditional grain crops and the area to the east produces large numbers of cattle and pigs as well as some grains.

McCreary is a shopping centre for the surrounding area and provides a number of commercial services as well as a hospital and schools. Good recreational facilities are at hand including one of the best skiing areas between the Great Lakes and the Rockies. Mount Agassiz Ski Resort is located just west of the community in Riding Mountain National Park. Water sports, hunting, fishing and golfing are also available nearby.

Industries locating, expanding or modernizing in McCreary, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Melita

October 1982 Community Report

Melita, incorporated in 1906, enjoys a scenic location between the Souris River to the east and Graham Creek to the west. The town is the regional trading centre for the south-western corner of Manitoba, and is situated at the junction of highways 3 and 83, 34km from the United States border and 37km from the Manitoba-Saskatchewan boundary. The Canadian Pacific Railway provides rail freight service to the town and daily truck and bus connections with Brandon and Winnipeg are also available.

The growth of Melita is attributed to its location at the junction of these two major highways and its emergence as a major farm implement distribution centre. Wheat, oats, barley, rye and flax are grown and cattle, hogs and poultry are raised in the area. Some years ago Melita joined with its neighbours to form the South-West Manitoba Development Corporation. This organization has encouraged the growing of vegetables and special crops, arranged for underground water resource studies and is presently involved in carrying out experimental work in irrigation farming. Crops successfully grown thus far include field peas, corn, potatoes, sunflowers, spice and mustard.

Oil is also found in the district, with approximately 20,000 barrels being shipped out each year.

Industries locating, expanding or modernizing in Melita, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Minitonas

October 1982 Community Report

The Village of Minitonas, incorporated in 1948, is located in the Swan River Valley. The Village is approximately 1.6km east of the site of Tent Town, the first settlement in the Swan River Valley. Tent Town sprung up in 1898 as settlers forged their way north to the Swan River Valley. Shortly thereafter, when rail service came, the village started on its present site. Minitonas is accessible via P.T.H. 10 and provincial road 366 which runs through the scenic Duck Mountain Provincial Park, and is 483km northwest of Winnipeg on P.T.H. 16 and 10.

A very popular attraction is Tent Town Game Farm comprised of 200 acres and made up in two sections - Funny Farm and Game Farm. The Funny Farm is home to a selection of exotic birds and animals such as bears, timber wolves, guanacos, foxes, racoons and others. The Game Farm provides a natural habitat for a buffalo herd, deer, elk and moose. Tours of the farm are available by horsedrawn wagons. The farm is located 2km west of Minitonas, 13km east of Swan River on P.T.H. 10 north and 1.5km at Game Farm Sign.

The economy of the area is based on agriculture. In addition, considerable logging and pulp operations are carried on in the nearby Duck Mountain Forest Reserve.

For the sports enthusiasts, the region offers good fishing and hunting. Wellman Lake, located in the Duck Mountains is 32km south of Minitonas.

Industries locating, expanding or modernizing in Minitonas, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Minnedosa

October 1982 Community Report

The Town of Minnedosa, incorporated in 1883, is located 209km northwest of Winnipeg and 48km north of Brandon at the junction of P.T.H.'s 16 and 10.

The Minnedosa and District Co-operative Museum houses pioneer material including the reconstructions of pioneer homes including a parlor, kitchen, etc. The museum is located at 2nd Avenue N.W. at 1st Street N.W.

Minnedosa is predominantly an agricultural service centre for an area devoted mainly to mixed farming and livestock production.

There are a number of industries located in Minnedosa. Morris Rod-Weeder Co. Ltd., farm equipment, is the largest. Other industries include a ready-to-move home manufacturer, a Mohawk Oil Gasahol plant, a printing plant, a creamery and a feed mill.

Minnedosa enjoys excellent recreational facilities. It has a large man-made lake which is extensively used for boating and swimming. Minnedosa hosted the Canadian Water Skiing Championships in 1962 and has been the site of the Manitoba Championships on different occasions recently. Other facilities include a 9-hole golf course, a skating and curling rink and a bowling alley. In addition, Canada's second most popular national park is only 48km north of the town at Clear Lake.

Industries locating, expanding or modernizing in Minnedosa, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Morden

October 1982 Community Report

The Town of Morden, incorporated in 1882, located approximately 113km southwest of Winnipeg on P.T.H. 3, is immediately below and east of the first prairie escarpment.

Of historical interest, located at the junction of Highways 3 and 31, 17.5km west of Morden, is a cairn honouring Pierre Gaulthier de la Verendrye, famous French explorer presumed to be the first white man to reach southern Manitoba and North Dakota.

Agriculture Canada Research Station is on 627 acres of farmland. Here new strains are sought for early-maturing field crops, fruits and ornamentals.

Located at Recreation Centre, 2nd St. N. is the Morden District Museum Inc. Here are skeletal displays, Indian Artifacts, art work, clothing, household items, and a collection of murals dating back to 1852-1990.

In the Pembina Hills, which lie to the east, the economy is based on cereal grains, rapeseed, cattle, hogs and poultry. In the Pembina Triangle, to the east, agricultural production includes cereal grains, sweet and field corn, peas, beans, sugar beets, carrots, sunflowers and rapeseed.

Morden is the regional service centre for the eastern half of the Pembina Triangle which serves the heavily populated surrounding area. Many manufacturing enterprises are located in the town, providing full-time and year-round employment. In 1982 the Town of Morden commenced construction of a new Civic Centre which will accomodate Administration, Police, Fire, Parks & Recreation and Chamber of Commerce. 3M of Canada has also started construction of a large Epoxy plant in the Morden Industrial Park. Morden hosts the Corn and Apple Festival each year during the last full weekend in August. This even attracts thousands of people who are treated to free corn on the cob, apple cider and Morden hospitality.

Morden will be celebrating its centennial in 1982 and celebrations will be held throughout the entire year.

Industries locating, expanding or modernizing in Morden, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Morris

October 1982 Community Report

Morris, a town incorporated in 1883, is located 56km south of Winnipeg at the junction of P.T.H.'s 75 and 23.

Of historical interest is the Morris River, known as the Scratching River. In 1801, this river was the site for two rival fur tradeposts of tense competition for dominance of the rich fur resources of the Canadian northwest. Neither were successful and both were abandoned a year after establishment.

Scratching River became a landmark for Red River carts proceeding to St. Paul, Minnesota and the Red River settlement. The town and river became "Morris" named after the Honourable Alexander Morris, Lieutenant-Governor of Manitoba, 1872-1877. A plaque now commemorates his memory. It is located at the southeast corner of the junction of P.T.H. 75 and Montreal Street East.

Also in Morris, is a cairn commemorating the moving of a cemetery where early pioneers were buried. The dedication is to the memory of the pioneers who died between 1872-1877.

In the town hall, a plaque is dedicated to the first Women's Institute of Manitoba, founded at Morris and Valley River in 1910.

The town is a trading centre for a prosperous grain growing area which boasts that it has never known a crop failure. This has been a very significant factor contributing to the area's economic stability.

Superior Bus.Mfg. Ltd., a manufacturer of school buses and ambulances is expanding its facilities. Other manufacturing firms in the town include Powermatic Industries Ltd. and Andres Wines Ltd.

Morris has two campgrounds which provide water and electrical service for 170 trailers. The town is the home of the Manitoba Stampede and Agricultural Exhibition. The Stampede is the second largest rodeo in Canada and the agricultural exhibition is one of the largest livestock shows held in Manitoba. This annual event brings 100,000 visitors to the town each year from all over Canada and the U.S.A.

Industries locating, expanding or modernizing in Morris, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Neepawa

October 1982 Community Report

The Town of Neepawa, incorporated in July, 1883, is located 109km northwest of Winnipeg at the junction of P.T.H.'s 16 and 5. The highly fertile agricultural land in the Neepawa District is known as "Beautiful Plains", and the local rural economy is dependent upon both cereal grains and livestock.

Of historical interest in Neepawa is a plaque located in Riverbend Park marking the Saskatchewan Trail, which formed part of the major route from the Red River settlement to Fort Edmonton some 1448km to the northwest.

The Beautiful Plains Museum is a living testimony to the pioneer families of Neepawa and surrounding district. Such features are various ethnic displays, pioneer items and a log cabin.

Located 6.5km west of Neepawa to P.R. 464, south on P.R. 464 for 8km, and .5km east is Murray's Museum of history of fossils, Indian artifacts, and pioneer items.

Neepawa is the home-town of famous author Margaret Laurence and the famous setting of "Manawaka".

Neepawa is a trade-industrial centre. Industries in the town include an integrated broiler operation, a timber preservative firm, and a new meat processing plant.

The head office of the Whitemud River Watershed Conservation District, which covers an area of more than 6,200 square kilometers, is located in Neepawa.

Neepawa has been awared the 'most-beautiful-town' award five times in the last fifteen years.

Industries locating, expanding or modernizing in Neepawa, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Population

Niverville

October 1982 Community Report

The Village of Niverville, incorporated in 1969, is located 32km south of Winnipeg off P.T.H. 59.

The Village functions as a thriving service centre to a highly populated surrounding farm area which is heavily intensified in poultry and related products. As a result, major commercial operations have been established in Niverville to serve this particular segment of the agricultural industry.

Industries locating, expanding or modernizing in Niverville, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Population

Notre Dame de Lourdes

October 1982 Community Report

The Village of Notre Dame de Lourdes, incorporated on January 1, 1963, is situated in the midst of the rolling hills of the Pembina Mountains. This provides a picturesque setting for the village, particularly in the fall of the year.

Notre Dame is located at the junction of Provincial Roads 244 and 245, 13km south of P.T.H. 2 and 129km from Winnipeg.

The area is suitable for dairy farming and beef cattle, and a considerable number of both are raised. Notre Dame's primary function is that of a service centre for the surrounding area.

Industries locating, expanding or modernizing in Notre Dame de Lourdes, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Pilot Mound

October 1982 Community Report

The Village of Pilot Mound, incorporated May 6, 1904, is located 193km southwest of Winnipeg via P.T.H. 3.

Of historical interest is a plaque to commemorate the "Buffalo Hunters Place".

Located 14.5km west and 2.5km north of Pilot Mound on Highway 253, is Marringhurst Pioneer Park. Here pictures and records depicting pioneer life are housed in the old school house.

On Highway 3, is "Old Mound" the site of prehistoric burial mounds. This was the signal hill of the Assiniboine Indians and served as a prominent landmark for explorers and settlers.

Pilot Mound Centennial Museum, Centennial Building, Broadway Street, houses furniture, books, maps and newspapers dating from the 1800's telling the history of the area with named of nearby Indian burial mounds.

The Pilot Mound area is in the black, medium-textured soil zone. The topography is gently rolling and the landscape dotted with willow and poplar bluffs as well as with the occasional maple. Crops of wheat, barley, oats, flax and some sunflower and silage corn are common to the region. Hog raising, beef cattle farming and dairying are also carried on.

The economic activity of Pilot Mound is primarily based on the agricultural service requirements of the surrounding area. This has been augmented recently with the establishment of a number of agriculturally based industries, including a cheese plant and a pet food supply operation.

Residents of the village and vicinity are but a short trip from the Holiday Mountain Ski Resort at La Riviere, via P.T.H. 3, and from Rock Lake via Provincial Road 253.

Industries locating, expanding or modernizing in Pilot Mound, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Entreprise Incentives Program.

Pinawa

October 1982 Community Report

Pinawa is Manitoba's "atomic age" town. The town is located 14.5km from the Whiteshell Nuclear Research Establishment. This community was established by Atomic Energy of Canada Ltd., and came into existence in 1963. This site, 121km northeast of Winnipeg on P.T.H. 11 and P.R. 211, on the Winnipeg River, was selected as the best place in which to build Manitoba's first nuclear research station. Full advantage has been taken of the natural setting and the town is planned in such a way as to retain the maximum amount of tree cover.

The major function of the Whiteshell Establishment is to conduct research into peaceful uses of nuclear energy with emphasis on the development of nuclear power plants.

Industries locating, expanding or modernizing in Pinawa, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Population

	Total	0-19	20-34	35-64	65+
1971 Census	2,190	1,025 (46.8%)	700 (31.9%)	460 (21.0%)	25 (1.1%)
1976 Census	2,080	945 (45.4%)	540 (25.9%)	585 (28.1%)	10 (0.5%)

Pine Falls

October 1982 Community Report

The community of Pine Falls is located 137km northeast of Winnipeg on Highway No. 11 on the south side of the Winnipeg River, and has been in existence since 1927. Pine Falls is economically dependent on the operations of Abitibi-Price Inc. and was planned and built to provide housing and services for the employees of the Company when the plant was constructed in 1927. The Abitibi-Price Inc. mill has an annual production capacity of 165,000 tonnes of newsprint intended primarily for the American and western Canadian markets. The area around Pine Falls is well-known for its excellent fishing and hunting. Other recreational facilities include a nine-hole, grass green golf course, heated swimming pool, skating, hockey and curling rinks.

Industries locating in Pine Falls, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest-free forgivable loan under the Rural Small Enterprise Incentives Program.

Plum Coulee

October 1982 Community Report

The Village of Plum Coulee was incorporated in 1901. It is located 113km southwest of Winnipeg on P.T.H. 14 in the heart of a major sugar beet production area.

The economy of the area is based on agricultural production which includes sugar beets, hogs, all cereal crops, potatoes, peas, beans, sunflowers, rapeseed and other special crops.

Plum Coulee has a number of recreational facilities such as a curling rink, a skating rink, a gymnasium, a tennis court, and the Centennial Park.

Industries locating, expanding or modernizing in Plum Coulee, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Portage la Prairie

October 1982 Community Report

The City of Portage la Prairie, incorporated February 1907, is located nea, the Assiniboine River, 84km west of Winnipeg. The city is served by the Trans-Canada Highway and by the main lines of the CPR and CNR.

The land in the Portage district is very level and highly fertile and is known as the "Portage Plains". The rural economy is dependent upon cereal grains, livestock, sugar beets, sunflowers, grass seeds, potatoes, rapeseed, onions, carrots and asparagus.

The industrial sector of the Portage economy is shared by the Campbell Soup Company and McCains Foods Ltd. A wide range of other products are manufactured or processed in the city including clothing, electrical cables, hand-painted glassware, canvas products, fishing tackle and dairy products.

Industries locating, expanding or modernizing in Portage la Prairie, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program, or an interest free forgiveable loan incentive under the Rural Small Enterprise Incentives Program.

October 1982 Community Report

The village of Powerview is located 137km northeast of Winnipeg on Highway No. 11 on the south side of the Winnipeg River.

Powerview is mainly dependant economically on the operations of the Abitibi Paper Company in Pine Falls. Abitibi has an annual production capacity of 165.000 tonnes of newsprint, intended primarily for the American and western Canadian markets.

The area around Powerview is well known for its excellent fishing and hunting. Other recreational facilities include a nine hole, grass green golf course and skating, hockey and curling rinks.

Industries locating, expanding or modernizing in Powerview, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest-free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Rivers

October 1982 Community Report

The Town of Rivers was settled in 1870, incorporated as a town in 1913, and is located on highway 25, 241km west of Winnipeg and 37km northwest of Brandon. In the early years of the century, it was an important railway point and still remains a divisional point on the C.N.R. main line. Its major role today is as an agricultural trading centre.

Of interest in Rivers, is the Chapman Museum containing artifacts and farm implements from pioneer days. The museum is located 31km southeast of Rivers, or 19.5km northwest of Brandon.

An air training base, established in 1940 was closed in 1971. The Department of Public Works (Federal) now administers the base. One industry is presently located at the centre, the Tim-Br-Fab Industries, home builders.

Industries locating, expanding or modernizing in Rivers, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Population

	Total	0-19	20-34	35-64	65+

Riverton

October 1982 Community Report

The Village of Riverton, incorporated in 1951 is located 130km north of Winnipeg via P.T.H. 8.

Of historical interest is a plaque located north of Riverton Avenue on the east side of Provincial Road 234, commemorating Icelandic settlers. These settlers were the founding members of Gimli in 1875. The following year, 1,200 settlers established themselves along the west shore of Lake Winnipeg. Riverton, originally named Lundi, was established soon after.

Also, a memorial in the village stands in memory of Captain Sigtryggur Jonasson, a community leader, and founder of the first Icelandic language newspaper.

The district is one of blackgrey soil which supports mixed grain farming and dairying.

Riverton is about 6km from Lake Winnipeg, is very sportsminded, and is a popular place for tourists. The marshes in the area are good sites for duck hunters in the fall.

The Riverton Boat Works manufacture steel fishing boats and barges in the village.

Industries locating, expanding or modernizing in Riverton, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Population

	Total	0-19	20-34	35-64	65+

Roblin

October 1982 Community Report

The Town of Roblin, incorporated as a village in 1913, and as a town in 1963, is located 386km northwest of Winnipeg at the junction of P.T.H.'s 5 and 83. P.T.H. 83 is a main north-south arterial road connecting the United States to Northern Manitoba and an increasing number of tourists are using this route. Roblin is a trading centre for a large, rather sparsely populated area, extending into the United States.

Of historical interest in Roblin is the Keystone Pioneer Museum. Displays of yesteryear include agricultural machinery in working order and pioneer domestic materials. The museum is located 7km east of Roblin on Highway 5.

The economy is based mainly on mixed farming and the forest products industry. Wheat, malting-barley, rapeseed and coarse grains are the principle crops grown and livestock production is very significant. The lumbering, wood pressure treating and woodworking operations give seasonal employment. Roblin Forest Products has developed markets for its pressure-treated wood products outside, as well as within, the province, including exports to some northern states of the United States.

The nearby lakes in the Duck Mountain Provincial Park offer excellent recreational facilities to area residents. The Asessippi Provincial Park is located at the Shellmount Reservoir 32km south of Roblin and has boat launching, camping, picnicing, and swimming facilities available.

Industries locating, expanding or modernizing in Roblin, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small enterprise Incentives Program.

Population

Rossburn

October 1982 Community Report

The village of Rossburn, incorporated in 1913, is located 153km Northwest of Brandon on P.T.H. 45 and only 12 miles from the Southern boundary of Riding Mountain National Park. Rossburn is predominantly an agricultural service centre for an area devoted mainly to mixed farming and livestock production.

Industries established in the Village include a cheese plant and a woodwork shop.

Rossburn offers a wide variety of excellent recreational facilities. These include golfing, baseball, curling and skating.

Located only 9 miles Northeast of Rossburn on P.R. 577 is beautiful Rossman Lake offering excellent camping facilities along with fishing, boating, swimming, and playgrounds for children. Situated on the picturesque North shore of the Lake is the Rossman Lake Youth Camp offering excellent facilities for small and large groups including dormitory accommodations for forty (40), a hall for instructional classes or other indoor activities and a large area for tenting or trailer parking.

Industries locating, expanding or modernizing in Rossburn, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Russell

October 1982 Community Report

The Town of Russell, incorporated on March 11, 1913, is located 354km northwest of Winnipeg at the junction of P.T.H.'s 16 and 83, 16km east of the Manitoba-Saskatchewan boundary. Highway 83 is one of the principal north-south routes in the Province. Served by two major highways and both railroads, the town enjoys good transportation facilities.

Of historical interest, located in Council Chambers, is a plaque commemorating Major C.A. Boulton (1841-1899), leader of the Boulton Scouts in the Northwest Rebellion as well as a promotor of the railroad and settlement of the area.

Russell is predominantly an agricultural service centre for a wide surrounding area. Grain crops, with some cattle, are the resource base of the district. Rapeseed is also grown on the mustard-free land.

The town and area offers a variety of recreational facilities. These include a tourist overnight park, a nine-hole golf course with grass greens and the Asessippi Provincial Park located northwest of the town.

Industries locating, expanding or modernizing in Russell, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Population

	Total	0-19	20-34	35-64	65+

Ste. Anne

October 1982 Community Report

The Village of Ste. Anne, incorporated January 1, 1963, is situated on the Seine River just 48km southeast of metropolitan Winnipeg near the junction of the Trans-Canada Highway and P.T.H. 12.

Of historical interest is a plaque located in front of the municipal hall commemorating old Dawson Road. This plaque tells of days before the railroads and of a land and water route from Fort William to St. Boniface starting west from the Northwest Angle of Lake of the Woods through the present Village of Ste. Anne.

Also, Point des Chenes Museum reflects the culture of the pioneers of the surrounding area.

Ste. Anne enjoys excellent medical and hospital facilities and boasts a modern medical clinic which houses five doctors, one dentist and a pharmacy. The clinic draws people from a wide surrounding area, from distances up to 45km away.

Agricultural production in the area consists of cereal grains, special crops, dairying, poultry, cattle and hogs. Market gardeners also do well in this vicinity.

Industries locating, expanding or modernizing in Ste. Anne, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Population

Ste. Rose du Lac

October 1982 Community Report

The Village of Ste. Rose du Lac, incorporated in 1920, is located south of Dauphin Lake, 282km northwest of Winnipeg on P.T.H. 5.

Of historical interest in the Village, is the "Grotto at Ste. Rose du Lac". Located on the banks of the Turtle River in Dollard Park, this grotto is an authentic replica of the famous Lourdes Grotto. Masses and rosaries are held outdoors during the summer months.

Ste. Rose is a growing community. It serves as a retail and service centre for the surrounding area. This district is ideally suited to cattle ranching and is one of the largest cattle feeder centres in Manitoba. The concentration on livestock led to the establishment of two auction marts.

Ste. Rose is also close to excellent fishing and recreational pursuits at Lake Manitoba Narrows, Manipogo Beach and Dauphin Lake.

Industries locating, expanding or modernizing in Ste. Rose du Lac depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

St. Claude

October 1982 Community Report

St. Claude, incorporated January 1, 1963, is a growing agricultural community that is situated on Highway No. 2 at junction of Provincial Road No. 240 which goes north to the Trans Canada Highway and south to the U.S. border.

The strong agricultural background of the community involves peoples who are into dairy farming, mixed farming and grain farming. The Village extends the services to the farmers such as our new seed plant, B&R Seeds. The St. Claude Creamery, Modern Dairies Ltd., is our major industry.

The Village of St. Claude provides a varied amount of recreational facilities such as the fair grounds that consists of five baseball diamonds, race track and a museum. Others are curling and skating rinks. Our Collegiate provides us with a public library and gymnasium.

Industries locating expanding or modernizing in St. Claude, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Population

	Total	0-19	20-34	35-64	65+
1971 Census	675	290 (42.9%)	95 (14.1%)	185 (27.4%)	100 (14.8%)
1976 Census	612	205 (33.5%)	105 (17.2%)	190 (31.0%)	110 (17.9%)
1981 Census	592	175 (29.5%)	110 (18.5%)	195 (32.9%)	130 (21.9%)

St. Malo

October 1982 Community Report

St. Malo, a growing community in South-east Manitoba, is located 65km south of Winnipeg on Highway No. 59. The Canadian Pacific Railway has a branch line running through Dufrost, which is eleven kilometres northwest of St. Malo. A new subdivision has been developed by the town with 25 of the 85 lots now being serviced with water and sewer.

St. Malo is a service centre for an agricultural area which produces mainly grain with some beef cattle being raised.

Manufacturing activity in St. Malo includes the production of oars by Outdoor Scene Ltd. and jackets by the St. Malo Manufacturing Company which is part of Rice Sportswear Ltd.

A popular recreational area is the St. Malo Park which includes a beach, picnic and camping facilities.

Industries locating, expanding or modernizing in St. Malo, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

St. Pierre-Jolys

October 1982 Community Report

The Village of St. Pierre-Jolys incorporated in 1947, is located 56km southeast of Winnipeg on P.T.H. 59. The community, as a permanent settlement, has a history that pre-dates by a year, the entry of Manitoba into Confederation. Even before this, the area had been the site of human activity. It has been a stopping place on the trade route to the United States.

An historical interest in the Village is a Pioneer Park (Place des Colons), a memorial stone and an authentic log cabin commemorate the pioneers.

A Tourists Information Booth located alongside P.T.H. 59 and opened during the tourist season is by far an important asset for this community.

The economic base of the community has always been rooted in agriculture. The success of this activity spawned the establishment of various services, and still provides the base upon which most of St. Pierre-Jolys' activity depends.

The community has been designated as one of the bilingual districts in the province.

St. Pierre-Jolys possesses adequate recreational facilities for all seasons activities — the yearly event being the Frog Follies held on the first week-end of August.

Industries locating, expanding or modernizing in St. Pierre-Jolys, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Le Village de St-Pierre-Jolys est une communauté active située à environ 56km de Winnipeg — éloignée de la grande ville sans toutefois avoir à sacrifier aucun des avantages d'une métropole.

L'agriculture est au premier plan de l'économie. Plusieurs entreprises font de ce Village un centre de commerce important. Ces attraits et plusieurs autres ont contribué à faire de cette communauté une localité idéale pour le commerce autant que pour les résidents.

Selkirk

October 1982 Community Report

The Town of Selkirk, incorporated in July, 1882, is named after Thomas Douglas, 5th Earl of Selkirk (1771-1820). He undertoof to relocate from Britain hundreds of Scottish and Irish settlers along the shores of the Red River and create for them a new land. The first group of settlers arrived in this part of the world via Hudson Bay in 1812, and are known to history as the Selkirk Settlers.

Today, Selkirk is a thriving community situated south of the lower tip of Lake Winnipeg, 29km north of Winnipeg on 4-lane P.T.H. 9. The town serves as a manufacturing, shopping, sporting and transportation centre.

The original commercial fishing, lake transportation and agricultural activities have been overtaken by the steel industry, light manufacturing, and an expanded service industry. Recent developments in the expansion of the steel-related industries and the further development of industry within the 150 acre Industrial Park have maintained a steady growth in the development of the industrial base for Selkirk. Recent additions in light manufacturing and the expansion of service and shopping facilities in the area have made this a viable community with a growing tax base.

Selkirk area is conducive to market gardening, cereal crops, special crops and forage. Soils being black loam in 2 & 3 class, there is also some organic soil present in certain locations.

Selkirk is close to historic sites such as Lower Fort Garry and the Churches on the Red. Located in Selkirk Park are the Marine Museum of Manitoba and a replica of the Red River Ox Cart. The recreational facilities of Lake Winnipeg enhances tourism as a growing industry. The largest Marine Museum between the Great Lakes and Pacific Ocean is located in Selkirk.

Industries locating, expanding or modernizing in Selkirk, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Population

	Total	0-19	20-34	35-64	65+
1966 Census	9,157	3,730 (40.7%)	1,726 (18.8%)	2,885 (31.5%)	816 (8.9%)
1971 Census	9,331	3,640 (39.0%)	1,850 (19.8%)	2,875 (30.8%)	985 (10.6%)

Shoal Lake

October 1982 Community Report

The Village of Shoal Lake, incorporated in January, 1909, is located at the junction of Provincial Trunk Highway No. 21 and No. 16 and on the Canadian Pacific Railway. Provincial Trunk Highway No. 42 connects Shoal Lake, Birtle, and St. Lazare to the west. Brandon, 121km to the southeast of Shoal Lake, may be reached via a number of alternative routes through a network of provincial trunk highways and roads.

The area surrounding Shoal Lake is characterized by soils of the grass-woodland transition type and is sparsely wooded with willow and poplar groves. The land is used for extensive cereal grain production, livestock farming and dairying.

The economic base of the community is mainly the service trade.

The village is well known by duck hunters who frequent it during the hunting season since the high density waterfowl breeding area of Western Manitoba encompasses Shoal Lake.

Industries locating, expanding or modernizing in Shoal Lake, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Population

	Total	0-19	20-34	35-64	65+

Snow Lake

October 1982 Community Report

The Town of Snow Lake, incorporated November, 1976, is located 943km northwest of Winnipeg via The Pas and Thompson highway and 700km via Highway 6.

The economy of the town is entirely dependent on the copper-zinc mining operation of Hudson Bay Mining & Smelting Co. Ltd. Hudson Bay Mining & Smelting's extensive exploration program resulted in several mines in the area. Ore grades are considered to be good and substantial deposits are indicated to sustain operation for some years ahead. A mill is in operation at Stall Lake Mine.

Despite its relatively remote location, many amenities are available in Snow Lake. For recreation there is good fishing and swimming very close by in the summer and in the winter there is skating and curling in enclosed rinks. The town has such services and facilities as a hospital, doctor, baker, hotel, restaurants and a Hudson's Bay Company retail store.

Industries locating, expanding or modernizing in Snow Lake, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Population

	Total	0-19	20-34	35-64	65+
1971 Census	1,582	795 (50.3%)	435 (27.5%)	355 (22.4%)	10 (0.6%)
1976 Census	1,645	725 (44.1%)	475 (28.9%)	425 (25.8%)	20 (1.2%)
1981 Census	1,853	790 (42.6%)	580 (31.3%)	480 (25.9%)	20 (1.1%)

Somerset

October 1982 Community Report

The Village of Somerset, incorporated in 1962, is located on PTH 23, 153km south west of Winnipeg and at the "top" of the Pembina Hills. The surrounding area is quite scenic and also offers good hunting.

The economy of the area is based on agriculture with increasing emphasis on dairying and hog production. The soils in the area offer good potential for specialized crop production.

Industries locating, expanding or modernizing in Somerset, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Population

	Total	0-19	20-34	35-64	65+

Souris

October 1982 Community Report

The Town of Souris, incorporated in 1904, is situated on P.T.H. 2, 48km southwest of Brandon, and 238km from Winnipeg. The townsite was built at the mouth of Plum Creek on the Souris River. The creek cut a deep trench along the banks of the Souris River forming a natural park setting. A bird sanctuary, swimming pool, picnic area, and modern trailer park have been developed at this site.

Of great interest in Souris is the famous semi-precious stone "agate" from which costume jewellery is made.

A great tourist attraction is the "longest (582 foot) suspension bridge in Canada" over the Souris River. In close proximity to the Bridge, is the Hillcrest Museum which is situated next to this bridge.

The only mozzarella cheese plant, Superior Cheese Canada Ltd., established in 1970, in Western Canada is located in Souris.

The Souris district is a particularly good grain producing area with the bulk of farm income being derived from various grain crops, potatoes and special crops. Internationally known purebred stock is raised in the area. Dairy farming, cattle feed lot operations and hog production are also important in the district.

Industries locating, expanding or modernizing in Souris, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Population

	Total	0-19	20-34	35-64	65+

Steinbach

October 1982 Community Report

The Town of Steinbach, incorporated in 1946, is located 64km southeast of metropolitan Winnipeg at the junction of P.T.H.'s 12 and 52.

The Manitoba Mennonite Historical Society has constructed a Mennonite Village Museum on a 40-acre site just north of the town. "Pioneer Days" are held there every August to commemorate the establishment of the first Mennonite community.

Steinbach is known throughout Manitoba as the 'Automobile City' because of the number of cars sold from the numerous car dealers in the town.

As well as industries based on the farming nature of the area, there is also millworking, concrete products, boat manufacturing and light industries operating at Steinbach.

Industries locating, expanding or modernizing in Steinbach, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Stonewall

October 1982 Community Report

The Town of Stonewall, incorporated on June 1, 1908, is located 32 kilometers north of Winnipeg and can be reached from the city centre within 35 minutes. Because of its proximity to Winnipeg, many of Stonewall's residents commute daily to work in the city.

Outside of Stonewall is Oak Hammock Marsh Wildlife Management area — best described as a wetland wonderland — renowned by birdwatchers and waterfowl hunters for the spectacular numbers of geese and ducks which feed and rest within the 9,000 acre wetland and upland complex during migration. The early fall is the ideal time to see waterfowl numbering up to 300,000. The open-water season affords a view of more than 250 bird species and numerous other organisms, composing this rich, diverse, ecosystem. This area is on provincial road 223, 22.5 kilometers north of Winnipeg between Stonewall and Selkirk.

Stonewall is a farm service centre for the surrounding area which produces cereal grains, flax, rapeseed, beef cattle, hogs, poultry and milk.

A rocket propellant plant was built a few kilometers south of Stonewall in 1963 by Bristol Aerospace Ltd.

Kinsman Lake was constructed in one of the old quarries which are within the town limits. A beach and camping facilities are available at the Lake.

The Town of Stonewall recently embarked on an economic development program with the hiring of an economic development officer. Business information and site location assistance is available to potential new business and industry.

Industries locating, expanding or modernizing in Stonewall, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Swan River

October 1982 Community Report

The Town of Swan River, first settled in 1898, incorporated on May 11, 1908 lies 515km northwest of Winnipeg at the junction of Highways 10 and 83 and is 26km east of the Saskatchewan border. It is strategically located with regard to transportation as most road and rail traffic to and from Northern Manitoba passes through the town.

Of historical interest is the Swan Valley Museum containing Indian artifacts, fur trade and homesteaders' goods, and photographs and reference library. Building restoration is in progress. The museum is located 1.5km north of Swan River on the banks of the Swan River.

Located at the junction of Highways 10 and 10A is a plaque commemorating the fur trade history of the Swan River Valley.

The town's economy is based on agriculture, forest products and tourism. It is the trading centre for the Swan River valley, a fertile area which is highly productive in cereal grains and special crops such as rapeseed.

The region boasts excellent hunting and fishing prospects and produces a very successful annual rodeo which features chuckwagon racing, bronc riding and chariot races. This event, which highlights the tourist season for the area, draws spectators and contestants from as far away as Alberta and North Dakota.

Industries locating, expanding or modernizing in Swan River, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Teulon

October 1982 Community Report

The Village of Teulon, incorporated June 10, 1919, is located in Manitoba's Interlake region, 58km north of Winnipeg on P.T.H. 7. The location is a strategic one as it is on the Canadian Pacific Railway line and Highway No. 7 which is the main road running through the interior of the region.

The Village of Teulon, named after Cara-Maria Teulon Castle; wife of Charles C. Castle. Mr. Castle was instrumental in bringing the CPR to the town. In gratitude he was asked to name the town and chose his wife's maiden name "Teulon".

In 1979, after tearing down old buildings, a new residence was built in the Village to house Indian students coming from points north (Island Lake, Norway House) to attend high school.

Teulon is home for Interlake Art Centre offering varied arts and craft courses throughout the year — fully qualified instructors in attendance.

The rural economy of this area is based on the production of cereal grains, alfalfa, potatoes, sugar beets, dairying, cattle, hogs and poultry.

The industrial sector of Teulon includes Promo-Wear Ltd. and Northern Goose Processors Ltd. Promo-Wear manufactures hats, toques and scarves. Northern Goose Processors plucks the feathers from farm-raised geese for sale in North America and Europe. Whole geese and cut-up geese are also sold.

Industries locating, expanding or modernizing in Teulon, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

The Pas

October 1982 Community Report

The Town of The Pas, is 748km northwest on P.T.H. 10 and 518.4km by air from Winnipeg. The Pas has long been known as Manitoba's 'Gateway to the North' and is a divisional point of the C.N.R. linking Western Canada with the Port of Churchill. It also provides rail access to the mining complexes of the region. As a result, The Pas has become a distribution centre for a number of these more northerly areas.

Of historical interest, located north of The Pas on the reserve, is an Indian handicraft shop where you may watch Indian women making moccasins, mukluks, jackets, etc.

Located on the banks of the Saskatchewan River is Christ Church, built in 1840. Furnishings in the Church were made by ship's carpenters attached to the relief expedition for Sir John Franklin. A plaque honors the first native to be ordained an Anglican minister in Western Canada in 1853, Reverend Henry Budd.

Located in Devon Park is a plaque and Cairn honoring Henry Kelsey, Hudson's Bay Company fur trader and explorer who travelled in 1690 from York Factory on Hudson Bay to the Saskatchewan River via The Pas.

Located at 1359 Gordon Street (No. 10 highway), is Little Northern Museum housing Northern Indian and pioneer material, a history of Northern Manitoba's flora and fauna are displayed plus curios from around the world.

Manitoba Forestry Resources Ltd., a major forest products development, produces approximately 375 tons of paper per day and 56 million board feet of lumber per year. This project has had a great deal of impact on the economy of The Pas and surrounding area.

Keewatin Community College, located in The Pas, provides both theoretical and practical training, supported by a broad program of related studies for residents of the entire north.

Industries locating, expanding or modernizing in The Pas, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Thompson

October 1982 Community Report

The City of Thompson, incorporated in 1970, located 784km from Winnipeg, was begun in 1956 following a decision by Inco Metals Company to develop a fully integrated nickel mining and refining project in the wilderness of north-central Manitoba. In 1981, the City of Thompson celebrated the 25th Anniversary of the discovery of nickel in the area.

Road access to the rest of the province is provided by Provincial Road 391, an all-weather paved highway. Two routes are available to the south from this highway — via The Pas and P.T.H. 10, and through Ponton and Grand Rapids on P.T.H. 6. A road connection to Nelson House, Lynn Lake and Leaf Rapids is now open north and west of Thompson via P.T.H. 390, and a road to Gillam is now under construction.

Thompson is surrounded by many lakes providing excellent fishing, and by unspoiled wilderness which provides many other opportunities and activities in summer and winter. The City itself, has many recreational facilities including a golf course, large indoor swimming pool and recreation centre.

Industries locating, expanding or modernizing in Thompson, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Treherne

October 1982 Community Report

The Village of Treherne, incorporated on December 31, 1948, is situated on P.T.H. 2 approximately 61km from Winnipeg and mid-way between the cities of Winnipeg and Brandon.

The economy of the area is centred mainly on agriculture. The soil of heavy black, silty loam provides an excellent crop and vegetable base.

The rolling lands of the Tiger Hills to the south provide a pleasant setting for the community. Pinkerton Lakes, some six miles south have been designated a wildlife management area. The Assiniboine River Valley, lying to the north lends itself to recreation and hunting. Recreational facilities include the Delahunt Golf & Country Club which was carved out of a natural woodlands setting, a new outdoor heated junior olympic swimming pool and the Cottonwood campground with hydro and water service for thirty units.

Industries locating, expanding or modernizing in Treherne, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Virden

October 1982 Community Report

The Town of Virden became a village in 1892, and incorporated as a town in 1904. The town is situated at the junction of the Trans-Canada Highway and Highway 83, 76km east of Brandon and 291km from Winnipeg on P.T.H. #1. Virden is celebrating its centennial in 1982.

Of historical interest in Virden, is a cairn marking the site of Fort Montagne a la Boisse. The Fort was a major source of pemmican in the 1790's. The site is located east of Virden and north 6.5km on the old Trans-Canada Highway (gravel road).

Located at 390 King Street is the Pioneer Home Museum of Virden and Districts. This is a large brick home completely refurnished depicting life in the Victorian era.

Virden is home for Manitoba's main oil field. At the Wayside Park at the junction of Highways #1 and #83 north, a cairn marks the site of the first producing oil well.

Virden is an agricultural service centre, having expanded in an orderly fashion as the needs of the area grew. Mixed farming predominates and the soil produces wheat, oats, barley, rye and flax, while the pasture land is excellent for livestock and poultry. In 1951, however, oil was discovered in the area and boom conditions promptly developed. In five years, the population doubled and several new stores and community facillities were established.

Present manufacturing activities in the town include flour milling and feed manufacture, printing, metalworking and farm equipment manufacturing.

The town is proud of its extensive development of recreation facilities. In addition to a modern recreation centre with an Olympic-size outdoor pool, it also has curling and skating rinks, lawn bowling facilities and a golf course. Virden is within 24km of Oak Lake, a summer resort area for the town.

Industries locating, expanding or modernizing in Virden, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Population

Wawanesa

October 1982 Community Report

The Village of Wawanesa, incorporated on December 4, 1908, is situated 48km southeast of Brandon on the Souris River, and 201km from Winnipeg on Highway 2.

Of historical interest, located in the Town Park, is a plaque in honour of David Thompson, fur trader, explorer, and one of the greatest cartographers of Canada's northwest.

Wawanesa is a very popular place with tourists as it offers hunting, fishing, a heated swimming pool and a good shopping centre. It is serviced by two bus lines and by Wawanesa Transfer.

The educational facilities are excellent at both high school and elementary school levels. The modern hospital has two doctors and a competent nursing staff. There is a senior citizens lodge with single units as well as two double suites.

The Wawanesa district is a particularly good farming area as well as being noted for pure bred cattle and hogs.

Wawanesa has a recreational centre with activities for young and old. Harness racing is an annual success and is a training centre for race horses. The annual Great Western Harness Race Meet is held on the weekend closest to July 1st.

Industries locating, expanding or modernizing in Wawanesa, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Winkler

October 1982 Community Report

The Winkler area was settled approximately 100 years ago although Winkler was not incorporated as a town until 1906.

Winkler is located approximately 75 miles southwest of Winnipeg at the junction of P.T.H.'s 14 and 32, and approximately 14 miles north of the U.S.A. border. In addition to the good highway accessibility, Winkler is also serviced by the CPR railway and the Winkler Municipal Airport.

Winkler is the centre of an area in which approximately 12 Mennonite Villages are located, which are of historical interest and still indicate their European flavour.

Winkler, located in the heart of the Pembina Valley, is noted for it's Class I soils and the most temperate climate in Manitoba, which is conducive to growing a variety of crops such as cereal grains, corn, sunflowers, sugar beets, rapeseed, peas, potatoes, canning crops as well as livestock, dairy, hogs, eggs, chickens, and other agricultural products.

Winkler's industries produce a wide variety of products, such as mobile homes, motor homes, travel trailers, aluminum doors and windows, steel truck boxes, steel buildings, overhead doors, caskets, metal castings, pumps, concrete mixers, tractor and combine cabs, agricultural machinery, steel railings, rafters and other manufactured goods.

Winkler's "Old Time Days", held every mid August, attracts thousands of people to a festive atmosphere in the downtown area, which is closed to traffic, with a variety of free entertainment as well as some old fashioned bargains.

Winkler has systematically attempted to expand and improve the recreational and cultural aspects of the community and has an excellent Public Library, swimming pool, hockey arena complex, curling rink, baseball park, bowling, tennis, horseshoe, soccer field, and recently obtained a franchise for a Junior A hockey team.

Industries locating, expanding or modernizing in Winkler, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Winkler Railings - ornamental steel railings

Winkler Woodcraft - kitchen cabinets, grandfather clocks, custom woodwork

Winnipeg Beach

October 1982 Community Report

The Town of Winnipeg Beach, incorporated in 1914, is situated on the shores of Lake Winnipeg, 75km north of Winnipeg on highways 8 or 9. Boundary Creek in Winnipeg Beach served as the Northern boundary of the "Postage Stamp" province in 1870.

"Where Manitoba Plays" pretty well describes the popular resort town of Winnipeg Beach. This rather unique tourist town has over 800 summer cottages and a summer population of 8,000 people.

The area surrounding Winnipeg Beach is one of mixed farming and the town serves as a service centre for this area.

Festivals include "Boardwalk Days" held in July and the "Wonderful Winter Weekend" held the 3rd weekend in February.

Industries locating, expanding or modernizing in Winnipeg Beach, depending on size may be eligible for either a Federal Government Grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Population

	Total	0-19	20-34	25-64	65+
1971 Census	685	200 (29.2%)	100 (14.6%)	235 (34.3%)	145 (21.2%)

Winnipegosis

October 1982 Community Report

The Village of Winnipegosis, incorporated March 7, 1915, is located on the western shore of Lake Winnipegosis. It is on Highway 20, 58km north of Dauphin and 381km northwest of Winnipeg. Rail service is provided by the CNR and there is also regular truck connections with Dauphin and Winnipeg.

The Village began as a central collection point to handle the large commercial quantities of fish caught in the lake. The primary industries of fishing and lumbering comprise a large part of the village's economy.

Of historical interest, located 1km from the centre of the vilage on the southwest corner of Block 8, is a monument and plaque in honour of La Verendrye and the building of Fort Dauphin by his son, Louis-Joseph.

Located 13km north of the Red Deer Point road and east for .8km, then north on foot for .8km along the hay meadow is the first Salt Spring Well in Manitoba. This location is on a 10 acre alkali field just on the outskirts of the lakeshore of Lake Winnipegosis. There is also an abandoned well on the site.

The Winnipegosis Museum is housed in a former CN station built in 1896. Here, local pioneer and native artifacts, early lumber, CN, and fishing industries are displayed. A 65-foot freighter contains displays on marine history and early industries.

Industries locating, expanding or modernizing in Winnipegosis, depending on size, may be eligible for either a Federal Government grant under the Regional Development Incentives Program or an interest free forgivable loan incentive under the Rural Small Enterprise Incentives Program.

Population

	Total	0-19	20-34	35-64	65+
1971 Census	885	315 (35.6%)	135 (15.3%)	270 (30.5%)	155 (17.5%)
1976 Census	893	305 (34.2%)	150 (16.8%)	255 (28.6%)	180 (20.2%)
1981 Census	855	245 (28.6%)	175 (20.4%)	240 (28.0%)	200 (23.3%)
